- Total of all percentages must Equal 100%** _____%

Please carefully check the confirmation you'll be receiving in the mail to make sure your investment instructions have been implemented properly.

Investing in mutual funds, which are intended as long-term investments, involves risk, including the possible loss of principal. Investments in foreign securities or sector funds, including technology or real estate stocks, are subject to substantial volatility due to adverse political, economic or other developments and may carry additional risk resulting from lack of industry diversification. Funds that invest in small or mid-capitalization companies experience a greater degree of market volatility than those of large-capitalization stocks and are riskier investments. Bond funds have the same interest rate, inflation, and credit risks associated with the underlying bonds owned by the fund. Generally, the value of bond funds rises when prevailing interest rates fall and falls when interest rates rise. Investing in lower-grade debt securities ("junk" bonds) may be subject to greater market fluctuations and risk of loss of income and principal than securities in higher rated categories. There are ongoing fees and expenses associated with owning mutual funds. Bear in mind that higher return potential is accompanied by higher risk.

For more complete information on the investment options, including their management fees and other charges and expenses, please consult the prospectuses and other comparable documents. Investors should carefully consider the investment objectives, risks, charges and expenses before investing. This, and additional information about the investment options, can be found in the prospectuses, which can be obtained by calling Merrill Lynch at (800) 229-9040. Please read these documents carefully before investing.

¹BlackRock, Inc. and Merrill Lynch Investment Managers have combined to create a new independent company. As a result of this transaction, several Merrill Lynch Investment Managers funds, including this Fund, have been re-branded as BlackRock funds. Please see the Fund's prospectus for details on its investment objective(s) and investment strategies.

²This is a collective trust that seeks to maintain a \$1.00 net asset value per share, although achievement of that objective cannot be assured.
